

February 2025

Seaford Wetlands Shared User Path Upgrade – Construction Update

We write to provide an update on the Seaford Wetlands shared user path upgrade.

Council has appointed a contractor, and works will commence in late February, with the project due for completion in mid-2025.

Project details

The Victorian Government is funding \$5 million of upgrades at the Seaford Wetlands including \$1 million towards the shared user path. The State Government and Frankston City Council have led most of the wetlands projects, partnering with Kingston to deliver the shared user path component at Patterson Lakes. This will create a full pedestrian and cycling circuit around the wetlands.

Construction details

A new 2.5m wide concrete shared use path will be created between Old Wells Road and the Melbourne Water Pump Station near 118 Palm Beach Drive (rear), along the northern side of Kananook Creek.

The path will connect to the existing footpath in Palm Beach Drive in front of the Melbourne Water Pump Station, creating the link to the newly constructed pedestrian bridge west of the pump station.

To ensure safety, construction works will restrict access to pedestrian areas. We aim to minimise disruption and provide adequate signage for alternative pathways. We apologise for any inconvenience during the works and look forward to delivering these improvements for the community.
